Industry News

New PAS 2030: 2023 documents available

Your online dashboard now includes PAS 2030:2023 documents under Forms and Procedures. The rest of your Quality Management System remains the same, as these documents are not related to any particular version of PAS.

To activate the documents, simply let your GreenPro consultant know that you want access to them. They'll be added to your dashboard free of charge. The 2019 versions will be retained for the foreseeable future.

PAS 2035 confusion solved

With the split of PAS 2030 and PAS 2035 into separate documents, we've been aware of confusion about who was responsible for which area of the overall process. To avoid this confusion, all new documents from GreenPro Easy PAS Plus are for PAS 2030 only.

All elements of a retrofit design - including areas such as ventilation assessments, air tightness, and medium term improvement plans - are the responsibility of the Retrofit Coordinator and Designer under PAS 2035 - not the Retrofit Installer under PAS 2030.

If you don't have one already, it's essential to have a qualified Retrofit Coordinator for your PAS projects who will facilitate the completion of a Retrofit Design.

The Coordinator is responsible for project management across the board from project inception to handover, including TrustMark lodgement of the job. Your responsibility, as a PAS 2030 Retrofit Installer, is to be in receipt of a Retrofit Design that claims compliance to PAS 2035, and to carry out a Pre-Installation Building Inspection and a project-specific Method Statement to ensure that the design is suitable for the building before installing. If it is not, you must inform the Retrofit Coordinator and it is their responsibility to make any corrections that are needed.

We strongly recommend reading the 2023 versions of the Procedures on your online QMS to understand the processes. Your consultant can also provide you with updated training assignments, process maps, example documents and updated checklists.

PAS 2030:2023 updated

A slightly changed PAS 2030:2023 was reissued on 31st August 2024. We have updated the link in your External Documents to this latest version. The change is in table A.1.

PAS 2030:2023 and PAS 2035:2023 are now available free of charge from BSI. Please ensure you have a copy of PAS 2030:2023 as soon as possible, as it is no longer behind a paywall, we refer to the document directly from the Procedures so you will need a copy to be able to obtain any information that we provide links to.

GreenPro News

Is the new Flexi-Orb scheme for you? We can help.

The new Flexi-Orb scheme officially launched on the 25th June and is now open for applications from installers. The scheme initially covers Solar PV, Battery Storage and Electric Vehicle Charge Point installations, with heat pumps to follow by 2025.

We've been working closely with Flexi-Orb to make sure that any of our customers looking to join the new scheme can do so as easily as possible.

Office Closure: 26th September

Our offices will be closed on Thursday, 26th September for staff training. If you have assessments around this time, make sure you speak to us beforehand so we can ensure you're prepared. Our phone lines and online chat will be fully closed, so do make sure to get in touch if you need us before this date. We will reopen as normal at 9am on Friday, 27th September.

Need to know more? Contact our team on 0161 768 5807 or info@greenpro.co.uk.

For more information on the Flexi-Orb scheme take a look at their website at [Flexi-Orb.com](https://flexi-orb.com).

Get your Health & Safety Training sorted with GreenPro

We've recently launched a complete set of Online Health and Safety Training Courses to make it easier for you to keep your team's training up to date.

We can tailor a set of courses for each of your team depending on their role, including subjects such as:

- Manual handling
- Working at heights
- Electrical safety
- Ladder safety
- Asbestos awareness

The short, online courses can be completed anywhere, using a computer, tablet or a mobile phone. Once you complete a course, you get a certificate which can be kept as a training record.

As an existing GreenPro customer you can get preferential pricing of just £15 per user per course.

[Find out more about our courses here.](#)

Health and Safety Advisor Service

In addition to the Health and Safety Training, we are now offering Health and Safety advisor support tailored for renewable and energy efficiency trades businesses.

Get your own named and qualified advisor from £400 – particularly useful if you're going for tenders, larger contracts or funding that requires you to have access to a qualified Health & Safety professional.

Find out more on our [website](#) or give us a call on 0161 768 5807.

We want your opinion to be heard

If you have a spare 5 minutes, it would be greatly appreciated if you completed our [Customer Satisfaction Survey](#) and let us know what features you'd like to see on our dashboard. We'll be collating all internal and external feedback to make some changes to how you use the system, and we'd like you to be involved!

We value you as a customer and want to make sure the service you get is as good as it can possibly be, so any general feedback is also welcomed!

Are you using the latest documents?

Remember to ensure that you are always using the most up to date forms, these can be accessed via your Online Dashboard.

And finally...

We want to ensure you're getting answers to your questions. We don't always know the answer, especially if it falls outside of our scope, but we will do our best to help you. Do get in touch with us if you have any questions at all. That's what we're here for.

If you do have any questions, either on the information within this update or any other PAS related matter, please contact your Consultant on 0161 768 5807, or alternatively email your Consultant or info@greenpro.co.uk to arrange a call back.
