Industry news

DESNZ announces more funding for Warm Homes Plan

The Government continues to roll out the Warm Homes Plan, which aims to improve 300,000 homes next year, including increases to the Boiler Upgrade Scheme as well as insulating more homes across the country.

Social housing residents, lower income householders and renters can receive funded energy efficiency upgrades - including insulation and low-carbon heating - through the Warm Homes: Social Housing Fund and Warm Homes: Local Grant respectively.

Ofgem releases FAQs for ECO4

Ofgem has released an extensive FAQ document for ECO4 and GBIS and we recommend keeping it to hand.

Covering questions on eligibility, notification, replacement products, installation requirements and more, it's a very thorough look at some of the most commonly asked questions across a range of topics.

There are more than 120 questions and answers which many installers may find useful. You can read the document by [clicking here](#).

PAS 2030:2019 vs PAS 2030:2023: A quick summary

What's changed between 2019 and 2023 versions of the PAS 2030? Here's a very brief overview:

- PAS 2035 has been moved to its own document. This means that the roles of the Retrofit Coordinator vs the Retrofit Installer role of PAS 2030 are more clearly defined and separate based both on qualifications and the expectations you'd find within a PAS project.
- Expansion of measures that require independent verification of the Pre-Installation Building Inspection. If you install insulation measures, we recommend checking your PIBI forms in your QMS as these will detail when the PIBI must be verified by a third party.

PAS 2035 has undergone some significant changes between the 2019 and 2023 versions. Your Retrofit Coordinator should be versed in these changes and ready to comply with them when you apply for assessment under PAS 2030:2023. Both PAS 2030:2023 and PAS 2035:2023 are free of charge from BSI, so we recommend obtaining a copy as soon as possible.

Reminder: The role of the Retrofit Coordinator

PAS 2035:2023 is its own, separate standard. This means that our PAS 2030:2023 QMS does not contain documents relevant to the requirements of PAS 2035. These requirements include design documentation, ventilation and condensation assessments, medium term improvement plans, and so on. It's the responsibility of the Retrofit Coordinator to either create these documents or to source them from appropriately qualified Retrofit professionals, such as a Retrofit Designer, Assessor, or Evaluator.

Your Retrofit Coordinator is the project manager for any PAS project. Your role as the Retrofit Installer is to possess a Retrofit Design from the Coordinator, including a claim of compliance to PAS 2035, and to review it carefully.

Any questions, issues, delays, or unforeseen additional works should all be passed to the Retrofit Coordinator to approve or organise. The Retrofit Coordinator must also log the project on TrustMark. So, it is imperative that you have a Retrofit Coordinator for your company. This role can be subcontracted out to a qualified Retrofit Coordinator or you can upskill in-house.

PAS 2030 is the installation side of the process. The documentation within your Easy PAS Plus QMS is designed to meet those requirements, not those of PAS 2035. However, PAS 2030 and PAS 2035 are intrinsically linked, so the best way to comply with PAS 2035 is to have a qualified Retrofit Coordinator in place to ensure those areas are being addressed. If you have any questions, please contact your Consultant for more information and guidance.

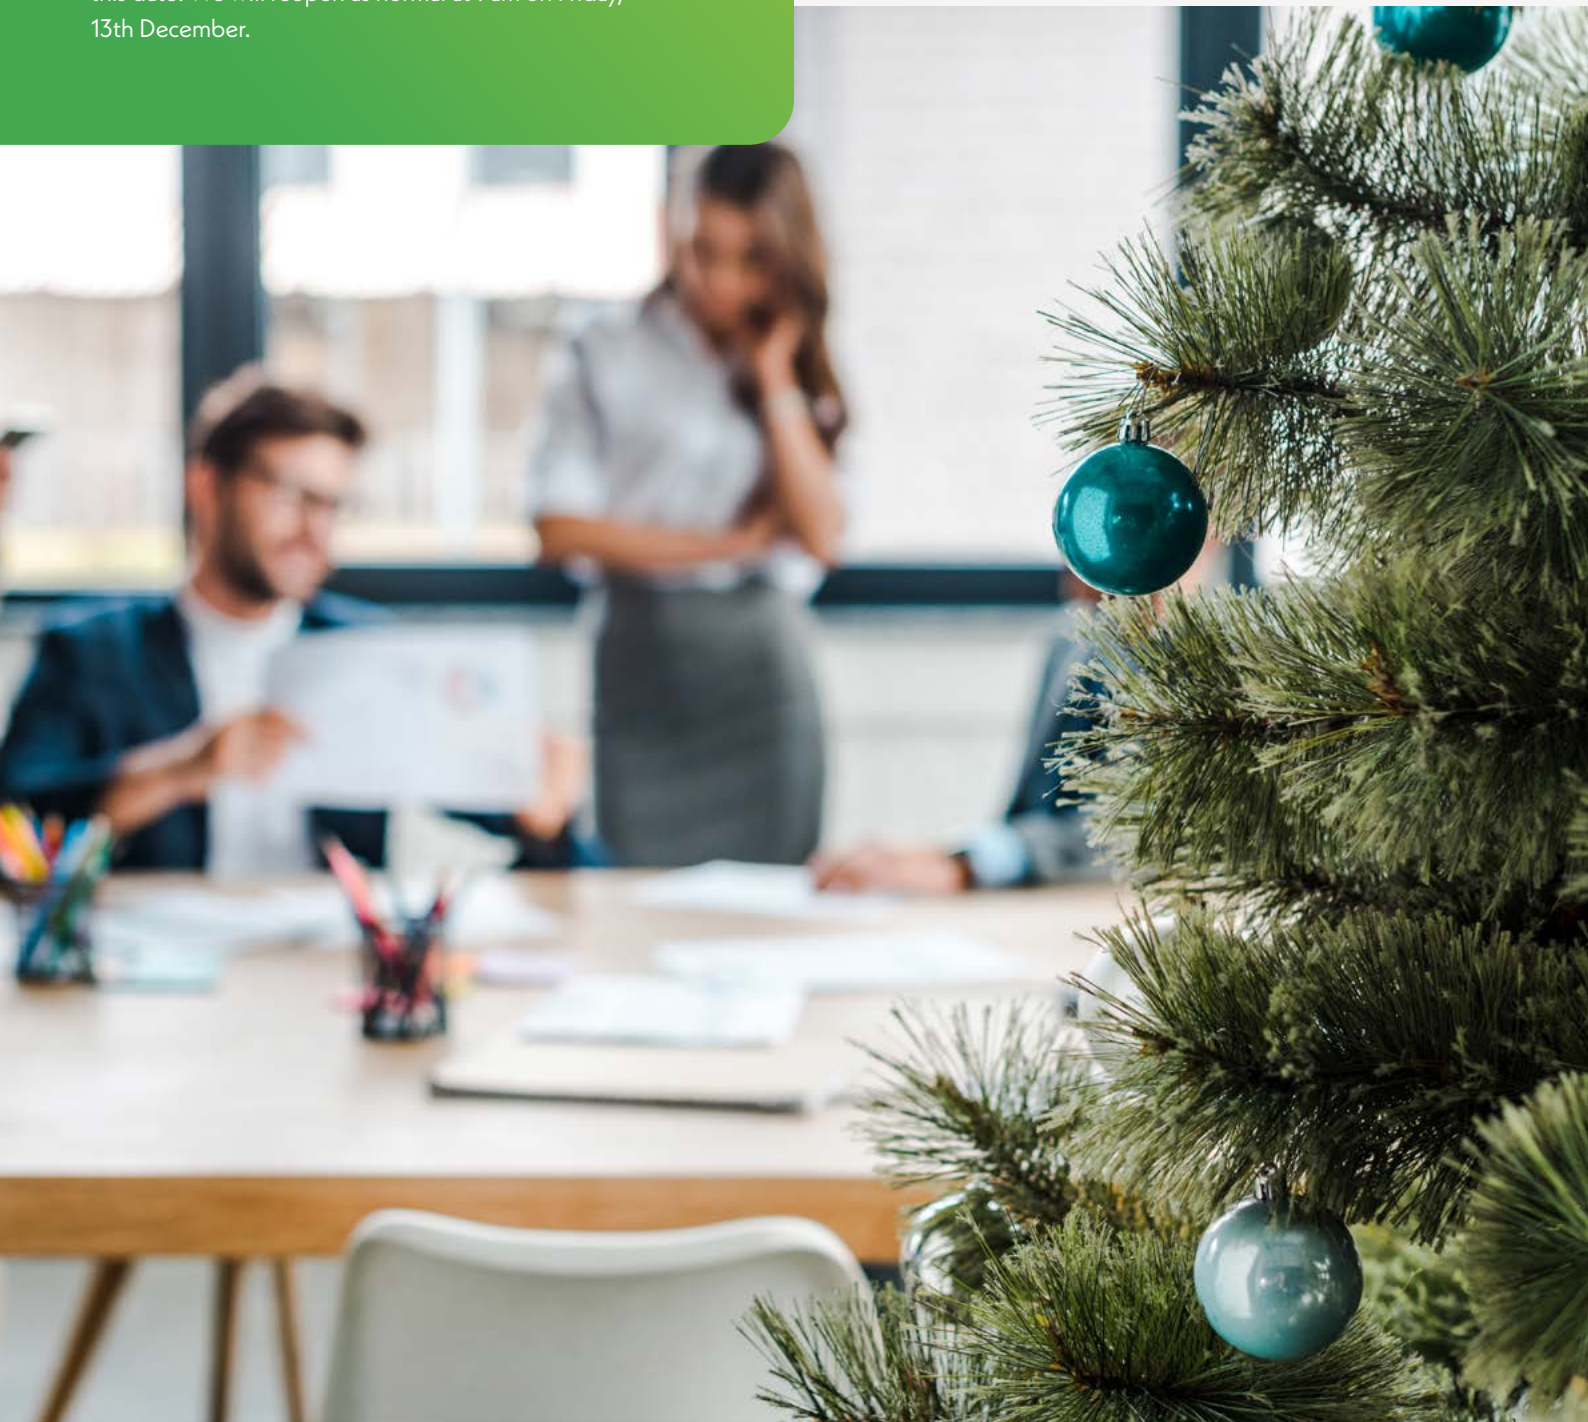

GreenPro news

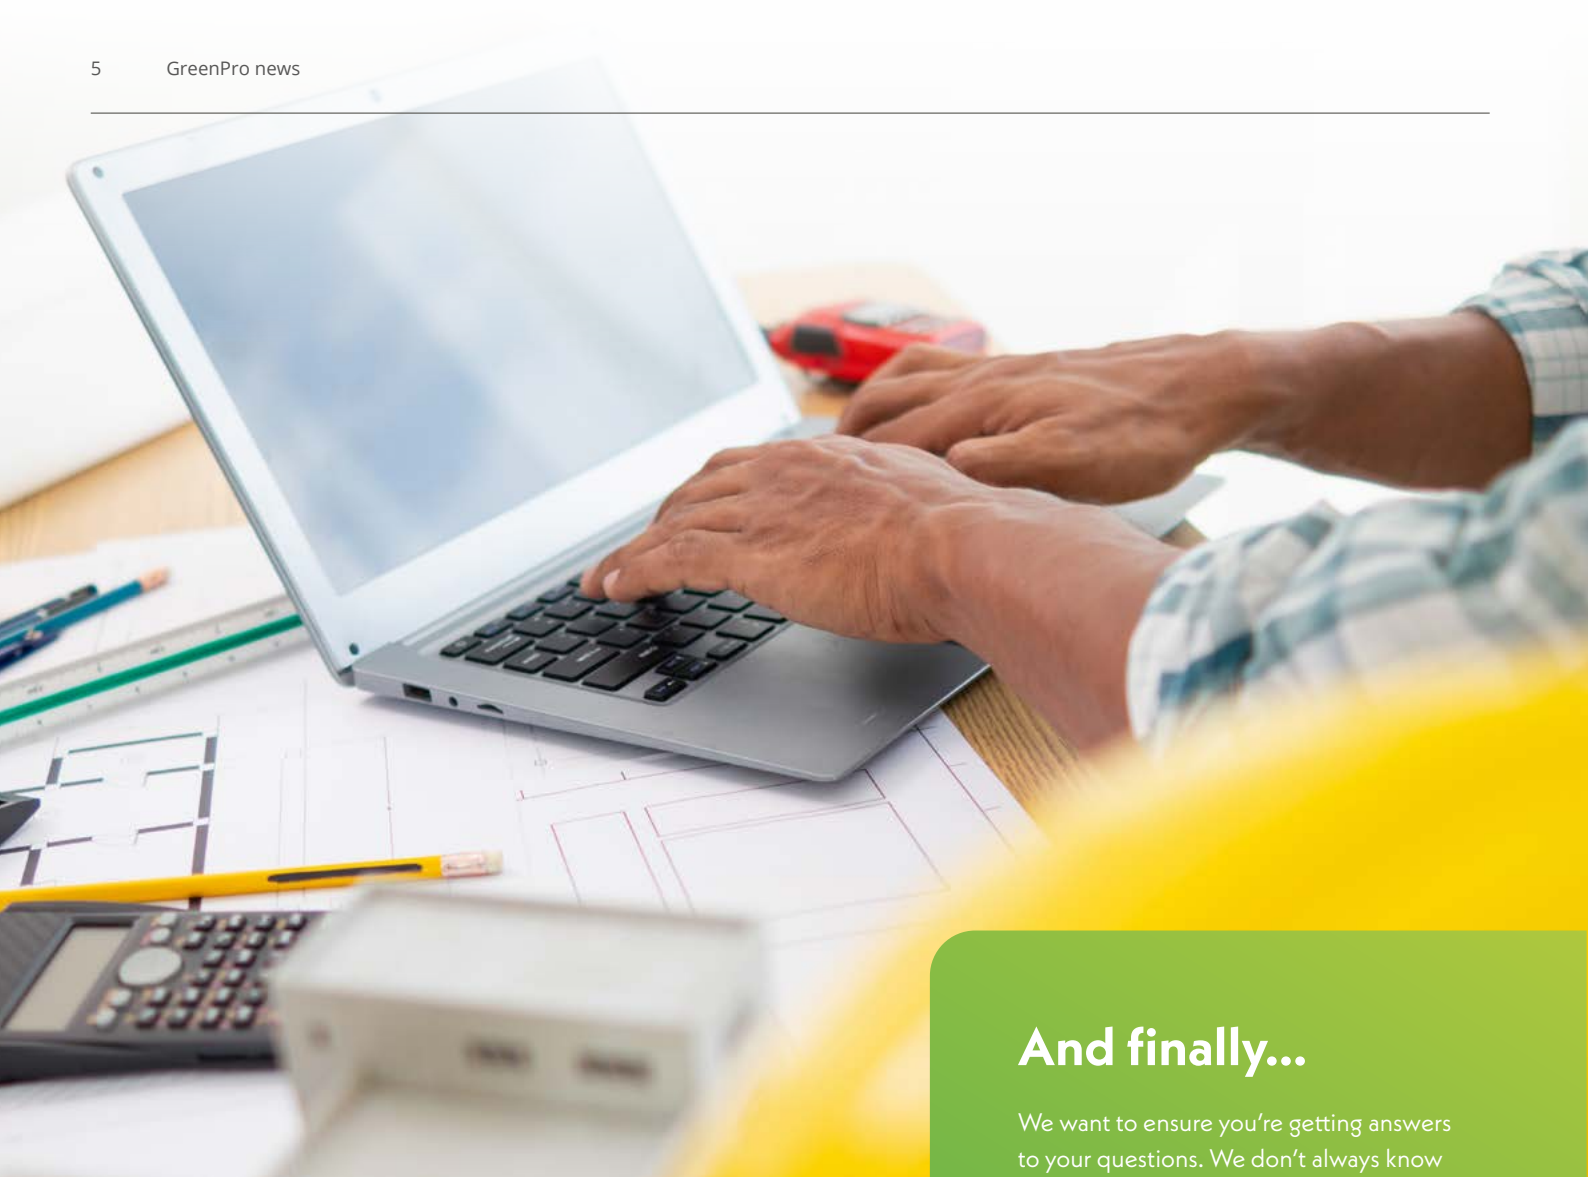

Office closure - Staff training

Our offices will be closed on Thursday, 12th December for staff training. If you have assessments around this time, make sure you speak to us beforehand so we can ensure you're prepared. Our phone lines and online chat will be fully closed, so make sure to get in touch if you need us before this date. We will reopen as normal at 9am on Friday, 13th December.

Christmas closure

Can you believe it's that time again? We will close for our festive break at 5pm on Friday, 20th December and will reopen at 9am on Thursday, 2nd January 2025. Thank you for your continued support. We wish you all a restful and joyous festive period.

Reminder: Get your Health & Safety Training sorted with GreenPro

We run a full suite of relevant online courses through GreenPro to meet your H&S needs. We also provide a Health & Safety consultancy service, separate to our Easy consultancy services. This is particularly handy if you are applying for tenders or have large contracts that require you to have consultancy in place.

Find out more on our [website](#) or give us a call on 0161 768 5807.

And finally...

We want to ensure you're getting answers to your questions. We don't always know the answer, especially if it falls outside of our scope, but we will do our best to help you. That's what we're here for.

If you have any questions, either on the information within this update or any other PAS related matter, contact your Consultant on 0161 768 5807, or email them at info@greenpro.co.uk to arrange a call back.
