

Note: Where compliance is claimed within this Quality Management System, the compliance claimed is to PAS 2030:2023.

The QMS is formatted as follows.

The Master Document Issue List

This is a list of all the documents we hold, which make up or help us to implement our Quality Commitments.

The Master Document Issue List is spread over 5 pages.

The Master Document Issue List covers the 5 sections of this manual.

Internal Documents

Any Revisions/Amendments to any of our Procedures will be noted on the A02 Revision and Amendment Register.

This section holds the documents which reinforce and explain our commitments to both Quality and Health and Safety.

Procedures

This section contains a full list of all the procedures that we will adhere to in all aspects of our work when working to PAS 2030.

Forms

This section holds the forms that are used in conjunction with our procedures.

Records

This holds the logs for the records that we need to keep. Each log entry will refer to a particular Customer Complaint, Corrective Action etc; the details for that particular incident will be kept in a named location.

External Documents

The External Documents are held in electronic format. These are the documents that we are required to keep to comply with certification regulations, or which are useful in our work.

Our Quality Management System will be maintained to ensure continued compliance with all PAS 2030 requirements.

4 Retrofit project management

This clause is covered under GD P01A Retrofit Design Validation Procedure.

5 The retrofit design

5.1 Installer responsibility to be in possession of a retrofit design
