Industry News

PAS 2030:2023 and PAS 2035:2023 come into force this month

At the end of March 2025, the new PAS 2030:2023 and PAS 2035:2023 will be enforced, making PAS 2030:2019 obsolete. As an installer, not much is changing for you, but the PAS 2035 changes are much more wide ranging. Therefore if you have an in-house Retrofit Coordinator, they should be well versed on the changes coming in and be sufficiently prepared for them. We would also advise you to check in with any subcontracted Retrofit Coordinators, as some of these rule changes involve site visits where they may not have been required before, so it's best to ensure that you're factoring in any additional costs to services that may arise from this.

As an installer, you must ensure that you are in receipt of a complete Retrofit Design that claims compliance with PAS 2035:2023, and be aware of your responsibilities and actions when it comes to any changes or issues. In almost all cases, you should check with your Retrofit Coordinator on how to proceed, as they are the ultimate project manager for any installations done under PAS 2030 and will be required to provide evidence of any changes to funders, TrustMark, and any other relevant bodies.

You should also be aware that there are certain measures that require independent validation of your Pre-Installation Building Inspection, more so than under PAS 2030:2019. These are insulation measures, and the appropriate measure-specific form for each one in your QMS will include a section for independent review, if it's required. These forms are in the 'Forms 2023' section of your online dashboard, and have the prefix 'GD S'.

While the requirements for you as an installer are not changing much, we'd recommend that you obtain a copy of both PAS 2030 and PAS 2035:2023, these are [free from BSI](#).

PAS 2035 will contain all the requirements for the design and coordination process, and can be a handy reference guide for any questions or concerns you have, alongside our team of Consultants.

Our friends in the industry have put some useful information together on the transition period for PAS 2035. You can sign up for a free webinar [here](#) and read a helpful article [here](#).

Reminder: ECO4 FAQs

Ofgem have released an extensive FAQ document for ECO4 and GBIS – there are over 120 questions and answers contained within which many installers may find useful. You can read this document by [clicking here](#). Covering questions around eligibility, notification, replacement products, installation requirements and more, it's a very thorough look at some of the most commonly asked questions across a range of topics and we recommend keeping it to hand.

Elmhurst release Retrofit Coordinator course

Elmhurst have released their own qualification for Retrofit Coordinators. If you're looking to upskill yourself or one of your employees to bring these skills in house, you can obtain a qualification now from the [Retrofit Academy](#) or from Elmhurst. [Click here](#) to read more about their course.

Office Closure: 20th March

Our offices will be closed on Thursday, 20th March for staff training. If you have assessments around this time, make sure you speak to us beforehand so we can ensure you're prepared.

Our phone lines and online chat will be fully closed, so do make sure to get in touch if you need us before this date. We will reopen as normal at 9am on Friday, 21st March.

GreenPro News

Tell us your thoughts

We're looking at the Easy PAS Plus service and platform in 2025 to make improvements to it for you. We want to ensure that any new features would be beneficial, so if you have any feedback for us about the use of the platform that would make it easier for you to complete your PAS projects, please do let us know. You can email us at info@greenpro.co.uk or simply contact your Consultant and give them some details.

We're collating feedback actively with the view to make these improvements so we want our customers to have direct impact on what those might be.

Staff News

The service we provide is only as good as the team that provides it, so we count ourselves very lucky to have such a dedicated bunch of people here at GreenPro. In that vein,

we like to celebrate their achievements and share them with you all!

James Allison, our longest serving Consultant, celebrated 14 years here at GreenPro in February. His knowledge is second to none and we appreciate him every day!

Tamara Bainbridge celebrated 10 years with us in January too as a Consultant – both James and Tamara have been the backbone of the consultancy service for almost as long as we can remember and we're very lucky to have them.

Katie Montgomery-Allsopp celebrates 5 years with us in March as a Consultant too. We're so very proud of our consultancy team and the effort and loyalty to the service they provide every day.

We also have anniversaries for the wider team too, from 1 up to 3 years. We're always working on ways to improve the service for you and to continue to provide top notch customer support, so we're thrilled that the team pays such an integral part of that.

Reminder: Get your Health & Safety Training sorted with GreenPro

We've recently launched a complete set of Online Health and Safety Training Courses so we can help you keep your team's training up to date.

We can tailor a set of courses for each of your team depending on their role, including subjects such as:

- Manual handling
- Working at heights
- Electrical safety
- Ladder safety
- Asbestos awareness

The short, online courses can be completed anywhere, whether you are using a computer, tablet or a mobile phone. When you complete a course you get a certificate which can be kept as a training record.

For existing GreenPro customers we are able to offer preferential pricing of £15 per user per course.

[Find out more about our courses here.](#)

Health and Safety Advisor Service

We are pleased to announce that in addition to the Health and Safety Training above, we are now offering Health and Safety support tailored for renewable and energy efficiency trades businesses.

Get your own named, qualified advisor from £400 – this is very helpful if you're going for tenders, larger contracts or funding that requires you to have access to a qualified Health & Safety professional.

Find out more on our [website](#) or give us a call on 0161 768 5807.

Ensuring you are using the latest documents

Remember to ensure that you are always using the most up to date forms, these can be accessed via your Online Dashboard.

And finally...

We want to ensure you're getting answers to your questions. We don't always know the answer, especially if it falls outside of our scope, but we will do our best to help you. Do get in touch with us if you have any questions at all. That's what we're here for.

If you do have any questions, either on the information within this update or any other PAS related matter, please contact your Consultant on 0161 768 5807, or alternatively email your Consultant or info@greenpro.co.uk to arrange a call back.
